NOTICE: This sequence may not represent the entire insert of this clone. It may be shorter because we only sequence overlapping sections once, or longer because we provide a small overlap between neighboring submissions.

all regions were double stranded or sequenced with an alternate chemistry; an attempt was made to resolve all sequencing problems, such as compressions and repeats; all regions were covered by sequence from more than one subclone; and the assembly was confirmed by restriction digest.

SOURCE INFORMATION:

VECTOR: pr Selection: This clone is from the first release of the human BAC library. library contains cloned DNA from a human male fibroblast cell 9785K. For references see: Shizuya et al., Proc. Natl. Acad. 89:8794-8797 (1992); Kim et al., Genomics 34:213-218 (1996). рвецо
